BPS BRAND
PACKAGING SOLUTIONS

INTRODUCING THE

BPS CATALOGUE

The launch of the new catalogue marks an important milestone for BPS. It presents our portfolio in a more organised and accessible way, supporting our teams in communicating our products clearly and consistently. As a manufacturer focused on flexible packaging, the catalogue brings together our full range in a clear and structured format, helping both our internal teams and our customers better understand the breadth of what we offer. It serves as a practical tool that strengthens internal alignment and improves how we present our capabilities to the market.

At the same time, the catalogue reflects the strength of our manufacturing operations. It highlights the expertise behind our production, the improvements made to existing lines, and the introduction of new flexible packaging solutions developed through our manufacturing know-how. These developments are guided by our core values - personalised service, responsibility, integrity, teamwork, ethics, creativity and promptness - which shape the way we design, manufacture, and deliver our products.

For our customers, the catalogue offers a simple and reliable guide to our flexible packaging range. By combining clear product information with visibility of our manufacturing standards and the values that guide our work, it helps customers understand the quality, flexibility, and commitment behind every product, strengthening their confidence in BPS as a trusted long-term partner.

We would like to take this opportunity to thank our customers for their continued support and trust, which remain essential to our ongoing growth and success.

GET TO

KNOW US

We manufacture bespoke polythene products for all packaging requirements. Our three sites in Turkey serve customers throughout the world. Following a multi-million-dollar investment at one of our three manufacturing sites, we now operate two new extrusion lines, bringing our total extruders to 50 and providing a strong platform for growth.

The three sites focus on producing shrink film, stretch film, centre-fold sheeting, single wound sheeting, layflat-tubing, pallet covers, pallet hoods, waste bags loose/roll, t-shirt bags loose/roll, patch handle bags, punched out handle bags, flexilop bags, mailing bags, blocked bags, wicket bags, doypack pouches, and vacuum bags, among many other products.

We specialise in crafting packaging that is both effective and environmentally responsible, allowing your business to appeal to environmentally conscious customers, now further enhanced by our 30% recycled content.

Our services cover every stage, allowing us to extrude, print, convert, and slit polythene precisely to your requirements. Placing customers at the heart of what we do and building strong client relationships is central to our business.

3 Locations!

WHY

BPS

As BPS, we are a well-regarded and competitively priced manufacturer of flexible packaging films, supplying the flexible, industrial and agricultural packaging industries. Customers worldwide, spanning industries such as food and drink, industrial, and fulfilment, rely on our bespoke solutions for their flexible packaging requirements. Here are a few reasons why they choose us.

INTEGRITY

At BPS, we are transparent about our identity, our services, and our processes. We keep customers informed about pricing and order progress, and we share frank views on developments within the ever-changing market.

RELIABILITY

BPS holds substantial levels of stock. Rather than treating this as a drawback, we use our stockholding capability to ensure reliable and swift service for our customers.

QUALITY

FAST DELIVERY

You can be assured that by choosing our services, you're not only benefiting from fast delivery, but also from flexible packaging of outstanding quality. Our products are crafted to meet the highest industry standards, offering durability, reliability, and an appealing finish. Whether for retail, industrial, or specialty applications, each bag, film, roll or pouch is rigorously checked to ensure consistent performance you can rely on.

OUR

CORE VALUES

At BPS, we are transparent about our identity, our services, and our processes. We keep customers informed about pricing and order progress.

OUR

REVAMPED

WEBSITE

The launch of our new website brings several benefits.

- A cleaner interface that improves the overall user experience.
- Faster page loading to save users' time.
- Optimised viewing on mobile devices and tablets.
- Simplified menus and navigation paths.
- Updated security systems for greater protection.
- Dedicated sections highlighting our flexible packaging solutions, making it easier for customers to explore products, specifications, and applications.

CAPABILITIES

As BPS, we are a well-regarded and competitively priced manufacturer of flexible packaging films, supplying the flexible, industrial and agricultural packaging industries. Customers worldwide, spanning industries such as food and drink, industrial, and fulfilment, rely on our bespoke solutions for their flexible packaging requirements. From extrusion and printing to converting and slitting, we offer a full range of services to meet your plastic packaging needs.

Set out below are a number of our capabilities:

- Extrusion
- Printing
- Lamination
- Converting
- Slitting

HEAR FROM

OUR CUSTOMERS

Large USA-based packaging supplier

Our client is the biggest provider of packaging solutions across the USA.

"We have worked closely with BPS as a trusted packaging manufacturer and have consistently been impressed with their professionalism and reliability. Their expertise in producing high-quality stretch films, coupled with their responsiveness and understanding of our needs as a distributor, has made procurement straightforward and efficient".

A major French client supplying products to the food, deli, and bakery sectors.

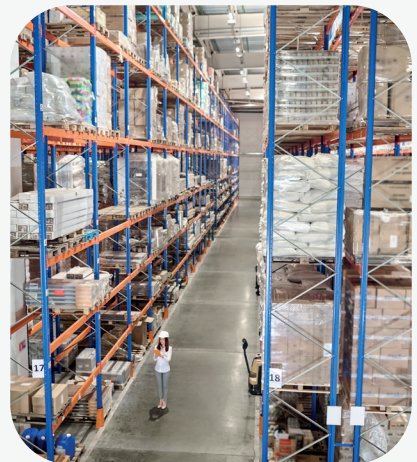

Our client is one of the largest suppliers of packaging items to the food, deli, and bakery sectors in France.

"Working with BPS as a packaging manufacturer has been a highly positive experience for our food, bakery, and deli distribution business. They take the time to understand our unique requirements and offer tailored solutions that streamline our procurement process. We would gladly recommend them to any distributor in the food sector".

Our client is among the largest FMCG wholesalers in the UK

Our client is a major supplier of FMCG products and packaging across the UK.

"Working with BPS has made packaging procurement effortless for our food wholesale business. Their team is always approachable, responsive, and willing to provide tailored solutions to meet our needs. From waste bags to T-shirt bags, their products are consistently reliable, and their support makes them a valued partner. We would confidently recommend BPS to any food wholesaler seeking excellent service and high-quality packaging".

Whether it's the bag that held your breakfast coffee, your favourite snack, or the refuse sacks collected by your local council, it may have started its journey at BPS. Our flexible packaging doesn't just serve a purpose, it's designed to perform, protect, and make life easier for our customers.

Waste Bags

Our waste bags, also called refuse sacks, garbage bags and trash liners, are available both on rolls and loose with a drawstring option. Durable waste bags for home or commercial use, available loose or on rolls, in a variety of colours and thicknesses, with options for printed branding, biodegradable materials, and heavy-duty use.

Rubble/Construction Sacks

We produce heavy-duty polythene rubble and construction sacks designed to withstand demanding site conditions, providing secure containment for waste, aggregates and building materials.

Bio Hazard Disposable Heavy Duty Bags

Designed to ensure the safe handling and disposal of hazardous waste, Our biohazard heavy duty waste bags are well suited to hospitals, and similar environments. Made from strong, tear-resistant materials, they minimise the risk of tearing or puncture in transit or during disposal.

T-shirt Bags

Our t-shirt bags, also known as vest carrier bags, are available both loose and on rolls. Made from LDPE or HDPE plastic, and available in a wide range of colours, with biodegradable and custom printing options to match your branding.

Flexiloop Bags

We manufacture strong flexiloop bags with loop handles, available in a range of colours, sizes and microns, including printed and eco-friendly options.

Patch Handle Bags

Our patch handle bags are durable carrier bags with reinforced handles, ideal for retail or grocery use. Made from strong LDPE, MDPE or HDPE plastic, they are available in a variety of colours and sizes. Options include custom printing for branding and biodegradable or heavy-duty versions to suit different needs.

Punched Out Bags

Punched-out handle bags, also referred to as die cut bags, are sturdy carrier bags with cut-out handles, perfect for retail or grocery use. Made from LDPE, MDPE or HDPE plastic, we produce them in a variety of colours and sizes. Options include custom printing for branding, as well as biodegradable or heavy-duty versions.

Straight Bags

Straight plastic bags are simple, handle-free bags, ideal for retail, takeaway, or packaging, available in a range of sizes, colours, and thicknesses, with options for printing and eco-friendly materials.

Mailing Bags

Mailing bags, also known as poly mailers, are strong carriers designed to protect parcels and goods during transit. Ideal for e-commerce, they are available in a range of sizes, colors, and thicknesses. Options include die-cut handles, secure adhesive closures, and custom printing for branding. A document pouch can also be included for added convenience.

Wicket Bags

Wicket bags are designed for efficient packaging and dispensing in high-volume environments. Commonly used in food production, retail, and manufacturing settings, they are stacked neatly on a metal or plastic wicket for quick and easy use. Manufactured from durable materials, they offer strength and reliability during filling and handling.

Block Bags

Our block bags are ideal for environments requiring quick and easy bag distribution. Arranged in compact blocks rather than on rolls or wickets, they can be lifted and separated with ease.

Duffle Bags

Our duffle bags offer a practical solution for carrying and storing products safely. Built to withstand heavy loads, they are suitable for retail, catering, and industrial applications.

Vacuum Pouches

Our vacuum pouches are available in a variety of sizes, thicknesses, and finishes, making them highly versatile for different types of products - from meats, cheeses, and vegetables to snacks. Customisable designs also allow brands to portray their identity, providing an attractive, professional appearance on shelves or in delivery.

Gusseted Bags/Liners

Our gusseted bags, also called liners, are flexible plastic liners designed with expandable side or base gussets, allowing them to increase in capacity when filled. Ideal for packaging powders, granules and loose products, they offer strength, flexibility and reliable product protection.

CPP Bags

Our cast polypropylene bags provide a strong, lightweight packaging solution with excellent clarity, allowing your products to be clearly displayed while remaining protected.

Tissue Bags

Our tissue bags are available both printed and unprinted, offering flexible solutions to meet your business needs. Whether you're looking for custom-printed tissue bags to showcase your brand or simple, unbranded bags, we have the perfect option for you. We manufacture these bags using high-quality materials to ensure they provide excellent protection for your products.

FLEXIBLE

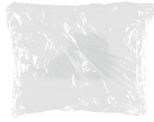

PACKAGING

Stand-up Pouches

Our doypack pouches are stand-up flexible packaging solutions, ideal for food, beverages, and retail products. Made from durable plastic films, they are available in a variety of sizes, finishes, and colours. Options include retort, resealable zips, custom printing for branding, and eco-friendly or biodegradable materials.

Oversized Bags

Crafted from quality polythene materials, our oversized bags offer long-lasting strength and tear resistance.

Garment Bags and Covers

We produce high-quality polythene garment covers and bags designed to protect clothing from dust, moisture and damage during storage or transit. Available loose and on rolls.

Films for Frozen Bags

Our flexible films are ideal for preserving flavour, texture, and freshness. Perfect for meat, fish, vegetables, and prepared meals, they help you portion, organise, and protect food in the freezer with ease.

Films for Coffee and Tea Packaging

At BPS, we specialise in producing high-quality, bespoke packaging for tea and coffee that not only protects freshness and aroma but also elevates your brand. Our packaging solutions are thoughtfully designed to combine durability and appeal, ensuring that every product stands out on the shelf.

Films for Pouches for Crisps, Nuts & Snacks

We manufacture flexible films ideal for dried pasta, nuts, crisps, and other snacks, available in a range of sizes, thicknesses, and printed.

Films for Ketchup & Mayonnaise Packaging

At BPS, we manufacture high-quality packaging that keeps your ketchup, mayonnaise, and other sauces fresh, safe, and visually appealing - our solutions combine practicality, durability, and style.

Films for Pet Food Packaging

Designed to preserve flavour, maintain nutrition, and ensure convenience for pet owners, we manufacture high-quality films that keeps pet food fresh, safe, and easy to store.

30%

RECYCLED

100%

RECYCLABLE

Quick Fact

Plastic mailing bags are one of the most widely used e-commerce packaging formats in the world. Their lightweight design helps reduce shipping weight compared to boxes, lowering transportation costs and carbon emissions.

bps

INDUSTRIAL

PACKAGING

We specialise in bespoke industrial packaging designed precisely to your specifications. With a modern production facility, expert engineers and advisers, we can support all your industrial packaging requirements.

Hand Type Stretch Film

We manufacture cast stretch film, made from high-quality resin with at least 30% recycled content. Available in 12–35 microns, 400/500mm widths, 150–300m lengths, flush or extended cores, and a range of colours. Suitable for food and offered in both bulk and boxed formats.

Pre-Stretch Film

Our pre-stretched high-performance film, typically in lower thicknesses, minimises plastic use and cuts pallet costs by up to 30%, while remaining environmentally friendly. Available in flush or extended cores, packed loose or in cartons. Available as machine stretch films for automated use or hand stretch films for manual wrapping.

Mini Stretch Film

Our mini stretch film rolls are ideal for hand wrapping smaller items and are widely used in e-commerce. They are produced in Clear, Black, and other colours and are available in flush core and extended core for easier handling, they are available in 12–35 microns, 100mm width, and 150–300m lengths.

Rigid Stretch Film

We manufacture rigid stretch films that are strong, durable, and puncture-resistant, ensuring pallet stability and load protection. Available in a range of thicknesses, widths, colours, and core.

Machine Type Stretch Film

Our machine stretch film is ideal for businesses handling high-volume packaging. Available in 12–35 microns with elongation from 150% to 300%. Can be produced in Clear, Black, and other colours, high-performance films ensure excellent pallet stability.

Nano Stretch Film

Our new-generation nano films, available in up to 67 layers with elongation up to 350%, are engineered for optimum hold force, tear resistance, and reduced plastic consumption. They help lower the cost per pallet, and stabilise loads in transit.

Spiral Stretch Film

Our spiral stretch film provides strong load security and even coverage for irregular and odd-shaped products. High bundling strength, and on-site manufacturing ensure consistent quality and performance.

Jumbo Stretch Film

Most of our stretch films are available in jumbo rolls, ranging from 40–50kg in weight and 40–50cm in width. They are also commonly used for converting into smaller rolls, providing flexibility for businesses that require a range of film sizes for different applications.

Coreless Stretch Film

Our coreless stretch films, available in both hand or machine forms, are pallet wrapping films manufactured without cardboard cores, helping to reduce waste and improve material usage. By eliminating the cardboard core, our coreless stretch films help lower waste management costs and maximise film utilisation.

Polyolefin Film

Our high-clarity polyolefin shrink film is designed to enhance product presentation without compromising strength. Ideal for stationery, games, and kitchen products. Our polyolefin shrink films are approved for food use and offer a long shelf life.

Pallet Hood

Our pallet hoods offer protection against dust, dirt and moisture. Manufactured in loose or perforated on rolls, with varying thicknesses, and available as gusseted bags or centre fold sheets.

Pallet Top Sheet

Our pallet top sheets provide a protective barrier against dust and moisture, ensuring your palletised items remain secure during storage and shipping. They are easy to apply—just lay over the pallet before wrapping.

Layflat Tubing

As manufacturers of layflat tubing and gusseted layflat tubing, we supply polythene tubing on rolls that allow you to create bags to your exact needs, providing convenient continuous use for packaging products of different sizes.

Single Wound Sheeting

We manufacture single wound sheeting on a roll. With no folds, the roll width equals the sheet width. We also supply cut sheets in boxes, widely used in the food industry for wrapping, separating, or covering products.

Double Wound Sheeting

We manufacture double wound sheeting, a robust polythene film wound onto a roll with two layers. This type of sheeting is ideal for packaging, wrapping, and protecting products. Its durability and versatility make it perfect for food, retail, and industrial applications.

Centre Fold Sheeting

We manufacture centre fold sheeting, a durable polythene film folded in half along the centre and supplied on a roll. The folded edge allows easy opening for packaging and is ideal for food wrapping, separating products, or covering products.

Micro Perforated Film

We manufacture micro perforated film, a high-quality polythene film with tiny perforations that allow for air circulation. This makes it ideal for food packaging, particularly for fresh produce, to extend shelf life while maintaining freshness.

Form Fill Packaging

We produce form fill film, a flexible and robust polythene film that adapts to the shape of products for a secure, tight-fitting package. Ideal for food packaging like cereals and dried foods, our form fill and seal packaging ensures airtight protection for perishable items.

INDUSTRIAL

PACKAGING

Machine-Direction Orientation

Our MDO film is manufactured by heating a polymer film and stretching it in a specific direction. This can happen on an MDO machine or as the final stage in blown film production. MDO film is widely used in food packaging, labels, and industrial applications.

Lidding Films

We manufacture both peelable and non-peelable lidding plastic films for packaging. Peelable films allow easy access to the product while ensuring a secure seal, while non-peelable films provide a stronger, tamper-evident seal. Both options comply with food safety regulations and are available in a variety of thicknesses for different applications.

Lamination Films

Our lamination films are available both printed and unprinted, offering a range of options to meet your packaging needs. These films are designed to provide superior durability, flexibility, and enhanced protection for a wide variety of products.

Thermoforming Films

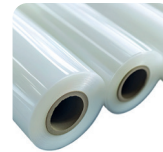

We manufacture premium thermoforming films, perfect for the cheese, meat, poultry, and bakery sectors. Available in different thicknesses, they're suitable for vacuum packing, gas flushing, and work with all thermoforming systems. Tailored to meet your specific needs, they also offer high-temperature resistance.

Shrink Film

We produce LDPE shrink films in both unprinted and printed options. Suitable for the food and drink sector among others, these films ensure products are safely bundled, transported, stored, and displayed. Our shrink films are applied around bottles, cans, or similar products and heat-shrunk for a tight, secure finish.

CPP Films

We manufacture CPP films, ideal for packaging food such as snacks and bakery items. These durable films provide excellent clarity, moisture resistance, and long-lasting freshness. Available in different thicknesses, they are perfect for wrapping, overwraps, and lamination.

BOPP Films

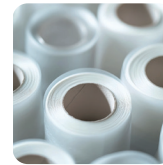

Our BOPP films, manufactured for flexible packaging, offer outstanding clarity and strength. Available in multiple thicknesses, they are ideal for labels, wraps, and lamination applications. BOPP films cater to various needs, including printing, lamination, bespoke bag making, and end-user flowwrap applications.

Wet Wipe and Diaper Packaging

Our wet wipe and diaper films are made from durable plastic films, they are available in various sizes, thicknesses, and colours. Options include custom printing for branding, and eco-friendly or biodegradable materials.

Tissue Film Packaging

We manufacture high-quality packaging that keeps pet food fresh, safe, and easy to store. Our range includes resealable bags and pouches, designed to preserve flavour, maintain nutrition, and ensure convenience for pet owners.

30%
RECYCLED

100%
RECYCLABLE

Quick Fact
Pre-stretch stretch films can reduce film consumption by up to 50% compared with conventional hand stretch film, helping businesses lower material use and wrapping effort.

bps

AGRICULTURAL

PACKAGING

We manufacture a full range of specialised films for farmers and growers in agriculture. Our extensive selection of agricultural polythene sheeting provides the ideal solution, whether you need covers to protect crops or to create optimal growing conditions. Our polythene films help reduce crop waste, maintain high quality, and maximise yields.

Silage Films

The silage films we produce serve to protect silage during storage, ensuring it stays both nutritious and safe for livestock. Their airtight and weather-resistant qualities are crucial for successful silage preservation, whether on small or large farms.

Bale Wrap Films

Bale wrap is a specialised film we manufacture, designed to tightly secure silage, preserving their quality during storage.

Greenhouse Films

Greenhouse films provide UV protection for crops, helping to create an ideal growing environment while allowing optimal light transmission.

Plastic Mulch Films

Our agricultural plastic mulch films are used to improve soil conditions by reducing weed growth, conserving moisture, and regulating soil temperature.

Tarps Films

Our agricultural tarps offer durable, weather-resistant protection for your crops, ensuring they stay safe and dry during storage and transport.

Quick Fact

Most supermarket carrier bags are made from LDPE, which can be recycled into new bags or bin liners. In the UK, the majority of plastic scrap film is sent abroad, often to countries like Turkey and Malaysia. This is the point where our innovative plastic scrap wrap films step in, produced with modern extrusion techniques, these films are specifically produced to wrap all types of baled waste with strength and efficiency.
